Plus and mi - nus have a mis - sion, spin the globe through "yours" and "mine".

NORTH AND SOUTH

North and South have fixed their poles
at two extremes
like heaven or hell
for passing souls
damned or redeemed.
Each pole a circle few may enter,
without, within,
It's lose or win –
each circle has a single centre.

*Times that multiply division,
swing around an equal sign.
Plus and minus have a mission,
spin the globe through 'yours' and 'mine'.*

East and West dance in a ring
they're bound in one
as bride and groom.
like yang and yin,
or father son.
They have no poles, just one equator,
a line that carves
into two halves.
A globe made whole by its creator.

*Times that multiply division,
swing around an equal sign.
Plus and minus have a mission,
spin the globe through 'yours' and 'mine'.*
